About Collectis

Collectis SA (www.collectis.com) is a world-leading company in genome engineering and genome surgery. The company is focused on developing and producing custom meganucleases for in vivo DNA surgery and also provides new tools for rational reverse genetics and targeted recombination. Collectis' products induce unique, site-directed, double-strand DNA breaks in living cell and can be used in a wide range of biotechnological and therapeutic applications. Collectis is listed on the NYSE Euronext Alternext market (ticker code: ALCLS). For more information on Collectis, visit our web site: www.collectis.com.
